Contivity VPN Client Upgrade, ver. 4.86

How to rename the attachment

If you did not rename the attachment at the same time you were downloading it to your computer, you will have a file in the download location (such as the desktop) with this kind of icon:
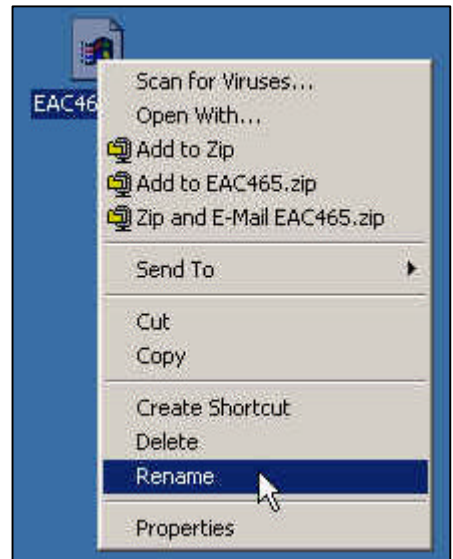

EAC486.ex_

To rename the file, click on this icon with your right mouse button:

Click with your left mouse button on the "Rename" option:

The icon will be selected, and the name of the file will be highlighted so you can change it.

Click once with your mouse button inside the name field. This shows the appearance of the icon after the mouse has been clicked:

EAC486.ex_

Scan for Viruses...
Open With...
Add to Zip
Add to EAC465.zip
Zip and E-Mail EAC465.zip

Create Shortcut
Delete
Rename

Properties

Delete the "_" character at the end of the file name and type "e" in its place so it reads "EAC486.exe."

When you push "enter" to lock in the rename, the appearance of the icon will change.

EAC486.exe
